PA165 Milestone 3 Evaluation

Evaluated project: https://github.com/m-mato/sem
Team: Gold
Evaluation by: Martin Kulíšek, 433504

Evaluation checklist:

- User interface
  - It is able to start the app with "mvn clean install && cd web && mvn tomcat7:run"   [OK]
  - The web application is available at http://localhost:8080/pa165   [OK]
  - Application uses in-memory database   [OK]
  - User interface implemented using Spring MVC   [OK]
  - The user interface should allow to carry out all business functions of your system   [OK]
  - App fills in all the necessary data automatically   [OK]
  - Validations implemented on user interface   [OK]
  - User interface uses Facade layer to access the system   [OK]
  - Each member of the team implemented part of user interface   [OK]
- REST layer:
  - Application has a basic REST interface   [OK]
  - At least one entity and operations on that entity are exposed   [OK]
  - The REST is accessible at http://localhost:8080/pa165/rest   [OK]
  - README file with instructions how to test the REST interface included   [OK]
- Security:
  - There should be at least 2 roles in the system   [OK]
  - There should be login form   [OK]
  - Password is not be saved in the database in open form   [OK]

Strong points:

- Multi-language interface. You can choose one of three language, independently of your browser language settings
- Nice GUI
- Readable and clean code (except some unused imports)
- Abundant REST interface
- Good exception handling

Weak points:

- Repeating content in messages.properties

Summary: -0 point
Proposed evaluation: 10 points
